ABOUT ME

I'm a final-year BCA student with a strong enthusiasm for exploring technology and turning concepts into working code. Over the past two years, I've been actively learning web development, where I discovered a passion for building responsive websites, developing front-end interfaces, and creating beautiful, user-friendly designs. I enjoy transforming ideas into functional projects and tackling challenges step by step. As I prepare to enter the professional world, I'm excited to continue growing in tech and making meaningful contributions through my skills.

EDUCATION

2023-till date

Bachelor of Computer Application
Amity university, Noida ,India
1st semester sgpa: 8.82   **2nd semester sgpa:** 8.91   **3rd semester sgpa:** 8.76

2021-2022

12th Grade, Central Board of Secondary Education(CBSE)
Ramagya School , Noida, India
Percentage: 84.4%

2019-2020

10th Grade, Central Board of Secondary Education(CBSE)
Ramagya School , Noida, India
Percentage: 91.8%

PROJECTS

Recipe finder
- Built a responsive web application using React.js, HTML , CSS and Javascript .
- Used TheMealDB API to fetch and display recipes based on user input
- **Tech Stack** : React.js , Javascript (Fetch API), HTML CSS

SKILLS AND PROFICIENCIES

Programming Languages: Javascript , Python, Java ,Sql
Framework: React.js
Version Control: Git, Github
Problem Solving
Proficient in English (written and spoken)

CERTIFICATIONS

2024 (1 month)

Certification in Javascript
Codecademy
- I completed a JavaScript certification where I learned core programming concepts and modern ES6+ features like arrow functions, let/const, template literals, and array methods. It helped me build a solid foundation in JavaScript and practical coding skills.

2024 (1 month)

Certification in Node.js
Codecademy
- I completed a Node.js certification where I learned the basics of backend development, including how to set up a simple server and handle basic routing.
